	Anurag Arya (2124531)	**6202609943**	
	Seea Rani (2022614)	**9915667484**	
Scope of Project	Maximum 2-3 Lines	**1. Connecting stakeholders in the construction industry:** **2. Offering a broad range of products** **3. Job opportunities for workers** **4. AI chatbot recommendations** **5. Customer reviews and ratings**	
Problem Statement	Maximum 4-5 Lines	**Many construction customers face difficulties in finding reliable and affordable laborers and rental vehicles in their local area. Additionally, they may have questions about construction-related topics or need help with designing their home layout. Our web app aims to address these challenges by providing a one-stop solution for accessing laborers, rental vehicles, an AI-powered suggestion tool, and a home design feature.**	
Project Outcomes	**Our platform aims to solve common project-related challenges faced by customers. We connect contractors, workers, and rental shop owners with customers, making it easy to find the perfect worker or product for the project. By providing rental options on a single or group basis, we offer flexibility and save customers time and money. Our AI chatbot provides construction-related advice to beginners, ensuring they get accurate recommendations. By using our platform, customers can enjoy peace of mind, knowing that their project will be completed efficiently and effectively, with reduced risk of delays or disruptions. We also aim to reduce unemployment by providing job opportunities to workers quickly.**
